

Filing Safes & Cabinets

The Diplomat Fire Resistant Filing Safe are ideal for the home or office. Built with added security to protect your documents and data from fire and theft.

The Fire and Security Safes are manufactured with high quality thick steel plating for added protection. The locking mechanism is covered with a drill resistant steel plate. Heavy duty steel hinges are provided for added protection from outside attack.

DFC4000E Available in cream & black

Safe Features & Benefits

- Secure payroll information
- Secure and file documents
- Drawers can hold up to 50kg
- Each drawer is independently fire insulated when closed
- Ability to allow selected drawers to be permanently unlocked for general access
- Heavy duty slide rails

Insulation

Insulated with reinforced gypsum that is low temperature oven dried to reduce free moisture to less than half a percent. An insulated bulkhead between each drawer provides additional protection.

Internal Fittings

Each drawer is built with high sides to accommodate hanging file folders so no additional frames are required.
